

S1 Cheetahs

- The Cheetah is a large cat.
- It is the fastest land animal.
- It can run up to 70mph (miles per hour).
- The Cheetah can accelerate from 0-60mph in about 3.5 seconds – that's faster than most sports cars.
- Cheetahs are mostly found in Africa, but there are also some in Iran.
- Cheetahs like to live in open areas of land like the African grasslands and savanna.
- Cheetahs have a short tan coat that has small black spots, which helps them to hide.
- Baby cheetahs are called cubs.
- Adult cheetahs can weigh up to 140lbs and are around 4-5 feet long.
- Cheetahs are smaller than other big cats such as lions, tigers, leopards, and jaguars.
- Male cheetahs often form groups with other males, but females usually hunt alone or with their cubs.

- Cheetahs usually eat small to mid-size mammals such as gazelles, impala, and hares.
- Cheetahs use their superior speed to catch their prey.
- A typical cheetah can live up to 12 years.
