INTRODUCTION

ABOUT IDAT CONCISE

The IDAT Concise is a way of offering an accurate snapshot of a student's abilities and attitudes for the purposes of admissions and diagnostics. As a branch of the International Diagnostic & Admissions Test (IDAT), the IDAT Concise-English and IDAT Concise-Total are designed to meet the needs of schools who are looking for an economical, effective and reliable student assessment tool to inform their admission and enrolment evaluations or to support student learning strategies.

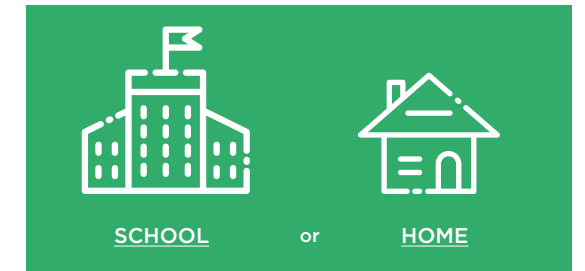

As with the IDAT, the IDAT Concise versions are based on IDAT's international curriculum. The IDAT Concise assessments are completely online and graded entirely by computer. They provide a fast, accurate measurement of a student's abilities. This is particularly convenient for schools who do not have the time or need for lengthier analyses. Delivered and proctored in schools or using a recorded version of the internationally recognised IDAT Secure 360, the IDAT Concise versions provide safe, consistent, immediate results that inform schools to support their students.

WHY CHOOSE THE IDAT CONCISE

Secure

The IDAT Concise is conducted in a fully proctored environment. It can be invigilated in partner schools, which adhere to strict test conditions, or it can be delivered using a recorded version of the internationally recognised IDAT Secure 360 system. This system allows students to be proctored in their home via video to ensure they abide by the test conditions. The IDAT Concise uses facial-recognition technology to provide students with a completely secure method of test-taking from anywhere in the world, and schools with results they can depend on.

Accurate

The IDAT Concise follows the IDAT curriculum, which is based on a cross-mapping of the national curricula from the UK, Canada, the USA and Australia. The IDAT has been quality reviewed by the University of Sydney Centre for Educational Measurement & Assessment and is endorsed by NEAS. The IDAT Concise-English assesses student language and literacy while also including a character self-assessment. The IDAT Concise-Total adds the mathematics, logic and critical thinking components to the profile. These short but thorough assessments provide a complete evaluation of a student's capabilities, attitudes, skills and subject knowledge base.

Affordable

The IDAT Concise is available for students across the globe through an affordable and accessible subscription-based pricing model for schools. The advantage of a computer-marked test is that it is far more cost and time efficient than similar tests available on the market, allowing schools, regardless of location, to have a cost-effective and reliable way to test students at much more reasonable rates than other tests.

Time Efficient

In the space of a few hours, students can book the test, take the test and receive their results. This level of efficiency means that schools, agents and families can minimise the time they spend on assessing students while maximising their time teaching and learning.
